

No. 8940. EUROPEAN AGREEMENT CONCERNING THE INTERNATIONAL CARRIAGE OF DANGEROUS GOODS BY ROAD (ADR). DONE AT GENEVA ON 30 SEPTEMBER 1957¹

ENTRY INTO FORCE of amendments to annex B² of the above-mentioned Agreement

The amendments were proposed by the Netherlands and circulated by the Secretary-General on 9 October 1979. They came into force on 1 March 1980, in accordance with article 14 (3) of the Agreement.

ANNEX B

Appendix B.5. LIST OF SUBSTANCES REFERRED TO IN MARGINAL 10 500 (2)

Amendments adopted by the Group of Experts

A. Amendments to be made to the nota

NOTA

- First and second subparagraphs, no change.
- Third subparagraph, read:

“When the first and second figures are the same, an intensification of the primary hazard is usually indicated; where the second and third figures are the same, an intensification of the secondary hazard is indicated; thus 33 means a highly inflammable liquid (flash point below 21°C); 66 indicates a very dangerous toxic substance; 88 means a very dangerous corrosive substance. However when the first two figures are 22, a deeply refrigerated gas is indicated; when the first two figures are 44, an inflammable solid in the melted state and at an elevated temperature is indicated. The combination 42 indicates a solid which may give off a gas on contact with water. When the identification number is 333, a spontaneously combustible liquid is indicated.”

- Fourth subparagraph, no change.

B. Amendments to be made to the list in marginal 250 000

Hydrocyanic acid, to read “663” instead of 66.

Natural gas, liquid, to read “1972” instead of 2043.

Phosphorus, white or yellow, to read:

“Phosphorus, white, in the melted state ... 4.2, 1° 436 2447”

Pyridine, to read “336” instead of 36.

Triethylamine, to read “338” instead of 336.
